

This year it's a different flu season!

The H1N1 vaccine is your best protection. New Clinic Hours.

Sorry, our clinics are closed from Sunday, Nov. 8 to Wednesday, Nov. 11 because we don't have enough vaccine to operate clinics. We apologize for the inconvenience.

We will re-open all of our clinics Thursday, Nov. 12 through Saturday, Nov. 14. Please see below for hours of operation.

- To get the H1N1 vaccine:
 - Come to a Peel Public Health H1N1 Vaccine Clinic – see schedule below
 - Check with your family doctor
- Pregnant women and those who have children aged 6 months to one year should contact their doctor to see if he or she can provide vaccine. If not, they should call Peel Public Health at 905-799-7700 between 8:30 a.m. and 4:30 p.m. to schedule an appointment to receive the vaccine. The shots will be administered through special Peel Public Health settings and specific obstetric practices.
- Children under 6 months of age should not be vaccinated
- Children under 10 years of age will require 2 doses. There must be at least 21 days between the first and second vaccine.
- If you think you might have the flu, wait until you are better to get vaccinated.
- The H1N1 vaccine is FREE.

Priority will be given to people under 65 years of age with chronic medical conditions (asthma, diabetes, heart, lung or kidney disease or those receiving treatments for cancer or other illnesses that might affect the immune system) and their caregivers; people who live with infants under 6 months of age, immunocompromised people, and those who cannot be vaccinated; children 1 year to 5 years of age; and health care workers.
